Dedicated Full-Stack Developer with a background in Applied Science. Expert in building AI-powered web applications using the MERN Stack and React Router 7. Leveraging AI tools like ChatGPT and Gemini to optimize development workflows, write clean code, and solve complex debugging challenges. Experienced in Cloud deployments (Vercel/AWS) and managing SQL/NoSQL databases.

Technical Skills

- **Languages:** Java, JavaScript, Python, TypeScript, PHP (Self-learning).
 - **Frontend:** ReactJS, Next.js, Angular, Tailwind CSS, Bootstrap.
 - **Backend:** Node.js, Express.js, Java Spring Boot.
 - **Databases:** PostgreSQL, MongoDB, MySQL, Firebase.
 - **Cloud & Tools:** AWS S3, Git, Vercel, Supabase, Postman.
-

Projects

AI Resume Analyzer & ATS Optimizer (Dec 2025) | [Link](#)

- Developed a full-stack AI tool using React Router 7 and Vite for intelligent resume analysis.
- Integrated Google Gemini 1.5 Flash AI for automated parsing and ATS scoring.
- Managed secure data storage with Supabase PostgreSQL and Row-Level Security (RLS).

Real-Time Chat Application | [Link](#) [Git](#)

- Built a real-time messaging platform using Angular 19 and Firebase.
- Implemented Server-Side Rendering (SSR) with Express.js to enhance performance and SEO.
- Used RxJS for reactive state management and asynchronous data streams.

Blog & User Management Systems (MERN Stack)

- Engineered RESTful APIs with Node.js/Express for secure data operations.
- Developed dynamic interfaces using React and MongoDB.

Education

Diploma in Enterprise Application Development |

Developers Stack Institute | Ongoing .

BSc. (Applied Science) | Wayamba University of Sri Lanka | 2025 .
